Integer Array

INTEGER ARRAY

"Write a C program to demonstrate pointer arithmetic on an integer array. Display element values using both array indexing and pointer notation. Show address difference between consecutive elements.

Sample Input:

Enter number of elements: 4

Enter elements:

10 20 30 40

Sample Output:

Using Array Indexing:

arr[0] = 10

arr[1] = 20

arr[2] = 30

arr[3] = 40

Using Pointer Notation:

*(ptr+0) = 10

*(ptr+1) = 20

*(ptr+2) = 30

*(ptr+3) = 40

Address Difference:

Address difference between arr[0] and arr[1] = 4 bytes"
